

ARM + Linux + Qt + DTV demo platform

ARM core & reference platform

Nokia Qt product

Endurance system architecture & product roadmap

Platform integrates Qt with DTV elements

Qt abstraction layers, DTV low-level modules

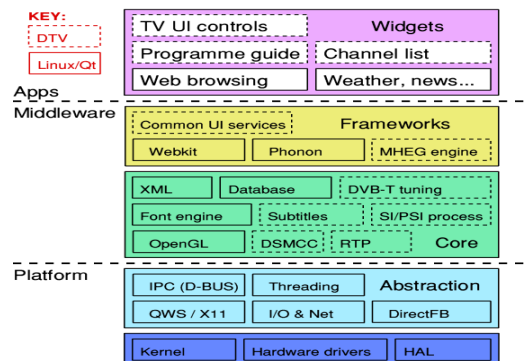

User interface components, widgets, browser

ARM Linux OS and drivers

Higher-level frameworks: Webkit, MHEG etc

Modular and extensible, Mixture of web-based (HTML+JS) UI elements and native (on Qt)

Endurance has produced an outline architecture showing a system based on the ARM reference platform running Linux, Nokia's Qt and a sample application

Endurance Technology

Product design, Embedded Development, Systems Integration & Test

Cable, Satellite, Broadband, Operators & Vendors

UK, India and Thailand offices
